

Store Transfers

Module:
Adaptive Inventory Management

Onebeat's Store Transfer feature addresses the challenges faced by retailers in managing inventory balancing and broken set consolidation. By leveraging advanced algorithms, real-time data, and comprehensive analysis, our solution enables retailers to optimize transfers, minimize costs, and enhance operational efficiency.

Key Challenges

Managing **big data involved in store transfers**, such as inventory levels, demand patterns, transportation costs, and product characteristics, can be overwhelming.

Retailers struggle to **identify cost-effective transfers** and efficiently balance inventory across locations to achieve optimal stock levels across locations and to **avoid imbalances and resource inefficiencies**.

Additionally, streamlining the consolidation of broken sets to optimize space utilization is a **complex and time-consuming task**, especially with the **numerous settings** required to optimize transfers

The Solution

Onbeat's Store Transfers Module **optimizes cost-effectiveness** by considering multiple factors, such as inventory levels, demand patterns, **Expected Sales Increase** and transportation costs, to identify the most efficient transfers.

With Onebeat, retailers achieve **optimal inventory balancing** by strategically determining the relevant inventory to move, utilizing real-time data and **advanced algorithms**.

Additionally, our solution streamlines **broken set consolidation**, analyzing product availability and demand to simplify the process and minimize the need for liquidation.

Onebeat's **comprehensive settings management** allows retailers to define and fine-tune transfer parameters, ensuring trips are optimized according to the **specific environment and clients' needs**

Higher Availability

70%

reduction in SKU Shortage in Stores (OOS)

Less Investment

50%

reduction in Store Inventory Value

Higher Freshness

30%

reduction in Average Age of inventory in stores

Higher Margin

20%

increase in full price Sell-through
